Space and Naval Warfare Systems Command Completes CANES Down-Select

SAN DIEGO – Northrop Grumman Space and Mission Systems Corp., Reston, Va., is being issued a \$36,646,047 delivery order under a previously awarded indefinite-delivery/indefinite-quantity, cost-plus incentive fee, cost plus fixed-fee and firm fixed-price contract (N00039-10-D-0028) for the procurement of the Consolidated Afloat Networks and Enterprise Services (CANES) common computing environment to include guided missile destroyer (DDG) variant first article; guided missile destroyer (DDG) variant production units; and multipurpose amphibious assault ship (LHD) variant first article.

This contract includes options which, if exercised at the maximum quantities, would bring the cumulative value of the contract to an estimated \$637,773,236.

Work will be performed in San Diego, Calif., and is expected to be completed by September 2012.

If all contract options are exercised, work could continue until September 2013.

Contract funds will not expire at the end of the current fiscal year.

The issuance of this delivery order to Northrop Grumman is the result of the CANES competitive down-select to a single contractor for continued performance under the contract options for development, production and logistics support for CANES.

The Space and Naval Warfare Systems Command, San Diego, Calif., is the contracting activity.
